

Mystery Christmas Advent Calendar 2022

How to Transfer the Template to your fabric...

This information is provided for those who have purchased the Digital Template.

You will need:

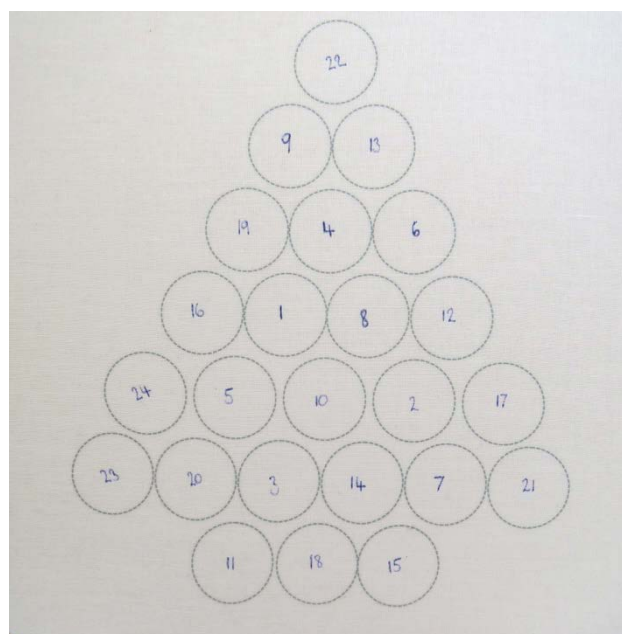

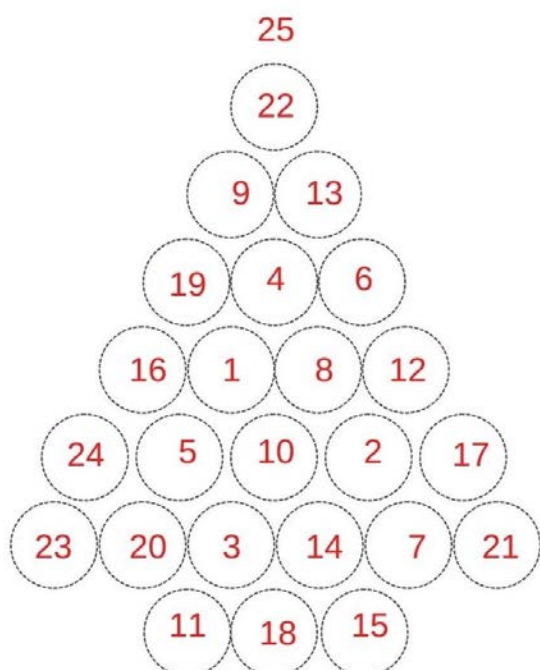

- The template printed out at the correct size
- Light Box
- Frixion Pen for tracing on to the fabric
- 15inch piece of fabric & stabiliser fabric

Using a light box, trace the template on to your fabric with a Frixion pen. As the circles are all the same size it would be time saving to make a circle out of card to use as a template for all of them – all you have to do then is place the card circle on the template and draw around on the fabric.

Don't use Sticky Fabri Solvy for the main template – you need to trace it on or purchase it pre done.

Once you are happy with the transferred template, you just need to write on the numbers for each circle following the diagram in the information given with your purchase. There are 24 numbers in total.

IMPORTANT NOTE: these numbers need to be erasable so a frixion pen is recommended (there is no guarantee the numbers will be hidden by the motifs.) You could use a water soluble pen as well.

Once transferred, you just need to wait for the 1st December to find out what the motif is for you to stitch on Day 1!
